Nbr Note

- The early flights through 1967 (until arrival at Miramar) make no explicit mention of the operating airfield, which can be inferred based only on the command
- Total hours for the month of May-68 added incorrectly in the log book. Log book shows additional 1.0 Total Pilot Hours than actual.
- Number of Arrests exceeds Cat shots. Though RON aboard is possible, the Remarks do not indicate such.
- 4 Many log book entries declare a 4-digit Flight code. The 4th digit is not understood or explained anywhere and is ignored in this spreadsheet
- Numerous landings and Touch & Go operations at numerous outlying fields during training are not recorded in the log book, only FCLs
- 6 Exact date of transition from VF-124 to VF-111 cannot be determined from the logbook entries
